

# TRENCH RESCUE

## EQUIPMENT

- PARATECH Structural, Excavation, Collapse, and Containment Struts
  - PARATECH Air Lifting Cushions
  - Supplied Air Systems
- Complete Trench Assessment and Extrication Equipment
- Atmospheric Monitors
  - Forcible Entry Tools
  - SkyHook Winch / Pulley Systems
- Rope Systems
- Patient Stabilization and Extrication Equipment
- Ventilation
- Personal Protective Equipment
- Hardline Communications
- Rescue Saws

## SKILLS

- Advanced Team Skills Training
- Artificial High Directional
- Confined Space Rescue
  - Environment Awareness
  - Fire Officer Certifications
  - Hazardous Material
- Personal Skills Training
- Trench Rescue
- EMT - Paramedic - Confined Space
  - Raising Systems & Lowering Systems
  - Belays

Trench Rescue is a highly specialized form of rescue as well as a subset of confined space rescue. Action Response Team is highly trained in both areas of expertise.

Our Team works very closely with companies, management and personnel to provide a safe working environment by helping with soil structure, depth of cut, water content of soil, changes to climate, superimposed loads, vibrations and other operations in the vicinity. This also includes continual monitoring of air to assure a safe and non-IDLH environment.

Our Team's high level of confined space training as well as Emergency Medical Services help to perform a quick and safe rescue in the event of an emergency situation. Our services include pre-incident planning, confined space entry permits, emergency rescue plans and 911 dispatch protocols. All these services help to maintain a high level of safety in compliance with OSHA regulations.

We use state-of-the-art air lifting cushions, structural and containment stabilizing struts and color coordinated hardline communication lines with supplied air hoses on portable deployment systems. These tools enable us to quickly perform any needed rescue.

Action Response Team is dedicated to the continual development of team skills, the use of state-of-the-art equipment and a shared desire to work in a safe environment, thus increasing productivity for those who hire our services.
